1. OPENING

Meeting held in Council Chambers, 132 Vincent Street, Beverley.

The Presiding Member declared the meeting open at 2:18pm. The meeting opened earlier than the advertised time due to a dangerous bushfire emergency in Beverley which required the urgent attention of the Chief Executive Officer and Manager of Works. Cr Ridgway was at the meeting but had to leave just prior to the start, also due to the bushfire emergency.

The Shire of Beverley acknowledge the Traditional Owners of the land on which we meet, the Ballardong People. We pay our respects to Elders past and present.

2. ATTENDANCE, APOLOGIES AND LEAVE OF ABSENCE

2.1 Members in Attendance

Cr DC White Shire President
Cr DW Davis
Cr CJ Lawlor
Cr JR Maxwell

2.2 Staff in Attendance

5. Shire President's Report

The Shire President read the following report:

Good morning Ladies and Gentlemen and welcome to the Electors' meeting for 2024, as we take time to reflect on the year past and look forward to projects planned for next year and beyond.

The last part of that opening statement took on some significance this year as the Shire sought to take advantage of a new Federally Funded Grants Programme.

In August 2023 the Commonwealth Government announced a new Grants Program which was named regional Precincts and Partnerships Program "rPPP". Unlike previous grants programs, the rPPP has two stages.

Under Stage 1, a pool of \$80 million is available for planning purposes and is limited to a maximum of \$5 million for any one applicant and a minimum of \$500,000.

Stage 2, a pool of \$320 million is available for construction purposes and is limited to a maximum of \$50 million for any one applicant and a minimum of \$5million.

This program was identified by the Council as an opportunity to potentially access funding for planning which has never been previously available, The Council has known for some time of the many projects that might be developed to improve the facilities to the community of Beverley. Knowing is one thing, but having the grant funding available to achieve these aims is another.

Identifying and bringing together all the potential projects of which we were aware gave rise to a concept plan that was named Beverley 2035. From this concept, the Shire took the information and developed into an application for Stage one of the rPPP.

In any grants program, the most important aspect of being able to apply for funds is having a plan that is 'shovel ready' and can adequately support any application. Unfortunately, developing any plan requires the assistance of consultants and these costs can be significant.

So, rPPP was seen as an opportunity to make an application under stage 1 for funding to develop plans for the facilities identified for Beverley and thereby be ready for future grants programs as they are made available.

From this, the Council engaged Mr. Mark Casserley to assist in this process, and from this proposal named 'Beverley 2035' ten main Projects were identified which would benefit Beverley. These projects would be slowly developed over several years.

This application was completed and lodged in September.

As the Council already had a plan for the redevelopment of the swimming pool, an application was made and lodged in February for funding under stage 2 of the rPPP. So far there is no indication when this application might be assessed.

On behalf of Council, I would like to thank Mr. Casserley for his assistance and to those members of the Community who provided feedback at each of the three meetings that were held in the week commencing Monday 12th August.

Among other matters coming to the Council this year, Beverley 2035 occupied a lot of time and has been seen as an opportunity to put into place all the issues that could benefit the community. Whether we are successful in our applications or not, Beverley 2035 will provide future Councils with a sense of direction and purpose.

CEO recruitment is also now occupying Council. Changes to the Local Government Act has meant that any Local Government whose CEO is coming to the end of a 10-year contract with a Local Government, must advertise the position and go through the process of selecting a CEO. The CEO whose contract has reached the ten-year expiration is able to reapply for the position. This is the situation with Beverley.

Mr. Stephen Gollan has served as CEO since January 2012 and his contract expires in January 2026. His service and record over these years has been outstanding. Among his achievements has been a significant amount of infrastructure development that has benefitted the community.

With the completion of the redevelopment of the Old School Building into a Civic Centre including relocated Council Chambers, under Mr. Gollan's leadership approximately \$17 million dollars has been invested into the community to provide such things as a new recreation centre, skate park, the Cornerstone building, improvements to the Town and Lesser Halls, new accommodation cabins, and a redeveloped Vincent Street. Funding for these projects has come largely from Grant programs which underpins the importance of the rPPP to Beverley.

The process for the CEO recruitment involves the appointment of a Panel to oversee the recruitment. This Panel comprises all Councillors as well as Mr. Lew Shaw the Independent Representative and Mrs. Lydia Highfield as the Consultant. It is planned that advertising will commence early February 2025 with selection completed towards the middle of 2025.

Mr. Gollan is eligible to reapply for this position.

The bridges within the Shire are of concern to the Council due to their age and size. Many of them are over 100 years old. Sadly, our State government doesn't seem to comprehend the seriousness of the situation. Larger farming equipment and an increase in road train activity means these bridges require urgent attention. Main Roads has acknowledged the situation and begun work to assist in remediation.

Sadly, the processes in place for Main Roads to follow are numerous and somewhat tedious with a result that nothing happens quickly. With the number of bridges within the Shire, time is becoming critical to deal with them all.

Council is also supporting the staff with the investigation of proposing the holding of an Air Show in Beverley in March 2026. It is a large undertaking but Shire has the support of the Beverley Soaring Society in this project. Mr. Stefan de Beer, Mrs. Jacinta Murray, and, Mr. Geoff Overhue recently travelled to Murray Bridge in South Australia to attend an Air Show. Knowledge gained here has proven invaluable. I would like to thank Mr. John Barrett Lennard who has volunteered to join the Committee given his past experience with the last Air Show held in Beverley in the '70s.

While the preliminary investigations are highlighting the extensive logistics involved, a final decision to commit to the Air Show will be made in late April or early May of 2025.

While all these matters mentioned are important, I want to acknowledge the work of community groups whose time and effort often go little noticed. Each of these groups comprise volunteers whose individual efforts and time ensure a vibrant community.

I would like to acknowledge the commitment and work by all the staff at the Shire, from the Road crew, the gardeners, the office staff, and we cannot forget the work of Janet at the Caravan Park. To the CEO, Stephen Gollan whose leadership has ensured a steady ship, thank you for your commitment to Beverley. To all the Councillors, thank you for your commitment to the work throughout the year and the support you have given me.

Finally, to everyone, a Merry Christmas, and Happy New Year.

6. Adoption of 2023-2024 Annual Report

MAE2/1224

Moved: Cr J Maxwell

Seconded: Cr D Davis

That the Annual Report for the Financial Year ended 30 June 2024, be received.

CARRIED UNANIMOUSLY

7. Annual Report Questions

Nil

8. General Business**Written questions received:** Nil**Questions from the Floor – Not recorded verbatim, summary only.**

8.1 – Mrs B Pearce

Question/Comment: I have concerns regarding the proposed Retirement Village as it is currently presented to the public. In principle, I am in favour of a Retirement Village but it needs to be right and there are many issues that need addressing.

Answer/Response: The application is currently a ‘live application’ which has not yet gone before Council. The public consultation period closed on Friday 6 December, however as the application has been delayed awaiting a Bushfire Management Plan and will now not be heard until the February 2025 Council meeting, the Shire Planner and Shire President extended an invitation to anyone who has comments to please visit the Shire Office so an official comment can be made.

8.2 – Mrs G Hastings

Question/Comment: Has concerns about the increase in traffic the Retirement Village will bring. The traffic using Dawson Street and Elizabeth Street is already travelling too fast and it will become even more dangerous.

Answer/Response: These concerns will be considered by Council when the application is presented. The applicant will also be afforded the opportunity to address any comments and concerns that are raised by the public.

8.3 – Mrs J Murray

Question/Comment: Council has spent a lot of money of the main street and the footpaths are lovely but they are constantly dirty and stained. They need better looking after.

Answer/Response: The Shire has appointed someone in the last month who will be responsible for looking after Vincent Street. The footpaths are due to be high pressure hosed tomorrow.

8.4 – Mrs J Murray

Question/Comment: It is disappointing that we have this lovely street and no Christmas decorations. The town of Pingelly is a similar size and their main street is decorated from one end to the other.

Answer/Response: Council looked into decorations last year and were quoted between \$20,000 and \$30,000 and felt it was too much. As this is an ongoing request, we note it and will look to make an allocation in the 25/26 Budget.

8.5 – Mrs J Rayner

Question/Comment: The gum tree at the hospital is still a nuisance. The mess on the footpath is like pebbles that are easy to slip on. Someone on the maintenance needs to check this regularly.

Answer/Response: Noted.

8.6 – Mrs J Rayner

Question/Comment: Thank you for the lights at the Air Strip, they are fabulous. St John and the RFDS are very happy.

Answer/Response: Council is very glad they are working well. In addition to the lights the entrance has now been sealed.

8.7 – Mrs B Pearce

Question/Comment: Another concern regarding the proposed Retirement Village is that the application mentions short-term accommodation. This does not make sense and this is not the type of retirement village we want.

Answer/Response: Council is aware of this and will be ensuring that if the application is presented as a Retirement Village then there will be conditions attached as per legislation that makes sure it is run as what it says it is.

The Shire Planner will suggest to the applicant that they consider making a presentation to the public so that any concerns and queries can be answered. However it should be noted that there is no obligation for the applicant to do this.

8.8 – Mrs S Collins

Question/Comment: I have retired to Hunt Road Village and I find the facilities very comfortable and well looked after by the Shire. Thank you for providing this type of accommodation.

Answer/Response: Thank you for providing that feedback.

8.8 – Mrs J Rayner

Question/Comment: On behalf of the community, thank you to the Shire and the employees for the work you do to keep our town going very well. I congratulate everyone on a successful year...but we do need Christmas decorations (then agreed upon by several members of the meeting).

Answer/Response: Thank you and we have well and truly noted that the community wants Christmas decorations.

9. Meeting Closure

As there were no further questions, the Shire President thanked everyone for attending and declared the meeting closed at 10:59am.

I hereby certify these Minutes as being confirmed in accordance with Section 5.22 of the Local Government Act 1995.

9.1 Development Application: Tree Farm – 1834 (Lot 400), York-Williams Road

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	2 December 2024
Applicant:	Garry Spouge – Landowner: Mining Motor Trimmers Pty Ltd (Consultant: Woodland Services)
File Reference:	YOR 51217
Author and Position:	Stefan de Beer, Manager of Planning
Previously Before Council:	27 November 2024
Disclosure(s) Of Interest:	None
Attachments:	Management Plan for Tree Farm

SUMMARY

An application for a *Tree Farm* on 1834 (Lot 400) York-Williams Road, had been received. The application will be recommended for approval.

BACKGROUND

An application was received from Garry Spouge to establish a *Tree Farm* on 1834 (Lot 400) York-Williams Road.

The application served before the Beverley Shire Council on 27 November 2024, but was laid on the table to clarify certain anomalies in the original submission regarding the location and use of Standpipes. An updated Management Plan has now been submitted and is attached hereto.

The application is accompanied by a justification statement and a comprehensive Management Plan as attached. This includes a Reforestation Plan, Fire Management Plan and species planting schedule.

The applicant has engaged *Woodland Services* to prepare the Management Plan for the proposal. *Woodlands Services* will also carry out the tree planting for the project.

The applicant submits that they intend to continue mixed farming practices on the better agricultural land and would like to re-introduce a mixed species planting of native trees and shrubs on the areas of the property that have not recently been used for farming. The applicant submits that areas not used for farming are evident by the untilled areas of the satellite imagery in the development application. The proposed planting area is currently estimated at 33 hectares.

The background statement in the submitted documentation states that the planting proposed will be part of a Carbon Sequestration Project which will operate under the Australian Government's Carbon Credit Unit Scheme (ACCU Scheme).

The application documentation states that there are no plans at the present moment to harvest any of the species in future.

The subject property is located at 1834 (Lot 400) York-Williams Road, is zoned *Rural* pursuant to the *Shire of Beverley Local Planning Scheme No. 3 (LPS3)* and is 76.2269 ha in extent. It contains a shed and water tank.

Pursuant to LPS3, a *Tree Farm* means:

land used commercially for tree production where trees are planted in blocks of more than one hectare, including land in respect of which a carbon right is registered under the Carbon Rights Act 2003 section 5.

A *Tree Farm* is a discretionary Land Use in the *Rural Zone* which means that the use is not permitted unless the local government has exercised its discretion by granting development approval.

COMMENT

When considering the application for a *Tree Farm* the guiding documents for assessment are the following:

- *Shire of Beverley Local Planning Scheme No. 3 (LPS3)*,
- *Local Planning Policy on Tree Farms (Policy)*.

Shire of Beverley Local Planning Scheme No. 3 (LPS3):

The subject property is located in the *Rural Zone*. Pursuant to LPS3, the Objectives of the *Rural Zone* are as follows:

- *To provide for the maintenance or enhancement of specific local rural character.*
- *To protect broad acre agricultural activities such as cropping and grazing and intensive uses such as horticulture as primary uses, with other rural pursuits and rural industries as secondary uses in circumstances where they demonstrate compatibility with the primary use.*
- *To maintain and enhance the environmental qualities of the landscape, vegetation, soils and water bodies, to protect sensitive areas especially the natural valley and watercourse systems from damage.*
- *To provide for the operation and development of existing, future and potential rural land uses by limiting the introduction of sensitive land uses in the Rural zone.*
- *To provide for a range of non-rural land uses where they have demonstrated benefit and are compatible with surrounding rural uses.*

In response to the above Objectives the applicant submitted the below statement:

The scheme objectives for the Rural Zone are to preserve broad acre agricultural activities as primary land uses whilst allowing other land uses compatible with the primary use. Additionally, environmental qualities of the landscape, vegetation, soils and water bodies are to be maintained and enhanced.

The planting proposed for Ydontcha Too will be part of a carbon sequestration project, the YdontchaTwo Project, which will operate under the Australian Government's Australian Carbon Credit Unit Scheme (ACCU Scheme). Under this Scheme, Garry Spouge who is the both the owner of the land and owner of the project will plant tree and shrub species native to the local area on the land that is not currently considered as viable agricultural land.

Shire Planner agrees with the proposition that the proposal is aligned with the Objectives of the *Rural Zone*. The expressed intent to plant less agriculturally viable parts of the subject property is specifically noted, and supported.

Local Planning Policy: Tree Farms (Policy):

The Shire of Beverley Local Planning Policy on Tree Farms states the following as Objectives of the Planning Policy:

- *Achieve a consistent efficient and equitable system for assessing and approving tree farm applications;*
- *Encourage tree farm developers to adhere to industry guidelines and standards as specified in relevant codes of practice and other documents; and*
- *Identify specific issues that the Shire wish to see addressed in the planning and development of tree farms.*

As per the Policy Statement, a Management Plan is required for a Tree Farm that provides details of the way in which a Tree Farm will be developed and managed and aims to demonstrate the means by which the principles of environmental care, cultural and fire management objectives are achieved.

The applicant submitted a Management Plan which, as per the abovementioned Policy Directives, included an Establishment Plan, ongoing Management Plan and a Fire Management Plan.

Shire Planner submits that the submitted statements and Management Plan sufficiently addresses the directives of the above Policy, and the application will be recommended be approved.

CONSULTATION

No external consultation was considered required.

STATUTORY ENVIRONMENT

The application may be considered consistent with the Shire of Beverley's Local Planning Scheme No. 3.

FINANCIAL IMPLICATIONS

There are no financial implications relative to this application.

STRATEGIC IMPLICATIONS

Strategic Pillar: 3. Environment
 4. Civic Leadership
Strategic Priorities: 3.3 Natural resources are sustainably managed
 4.3 Responsible planning

POLICY IMPLICATIONS

There are no policy implications relative to this application.

RISK IMPLICATIONS

It is considered that the proposal has insignificant risks.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium (5)	High (10)	High (15)	Severe (20)	Severe (25)
Likely	Low (4)	Medium (8)	High (12)	High (16)	Severe (20)
Possible	Low (3)	Medium (6)	Medium (9)	High (12)	High (15)
Unlikely	Low (2)	Low (4)	Medium (6)	Medium (8)	High (10)
Rare	Low (1)	Low (2)	Low (3)	Low (4)	Medium (5)

Risk Rating	Action
Low	Monitor for ongoing improvement.
Medium	Comply with risk reduction measures to keep risk as low as reasonably practical.
High	Review the risk and take additional measures to ensure risk is low as reasonably achievable.
Severe	Unacceptable risk level, reduction measures must be introduced before proceeding.

VOTING REQUIREMENTS

Simple Majority

OFFICER'S RECOMMENDATION & COUNCIL RESOLUTION

M3/1224

Moved Cr Lawlor

Seconded Cr Maxwell

That Council resolve to grant planning approval for a Tree Farm at 1834 (Lot 400) York-Williams Road subject to the following conditions and advice notes:

Conditions:

- 1. Development shall be carried out only in accordance with the terms of the application as approved herein and any approved plan, prepared by the applicant and endorsed by Council's Shire Planner.**
- 2. The submitted Management Plan are to be complied with at all times, to the satisfaction of the Shire.**
- 3. On the Shire's request, a report shall be presented to the Shire indicating compliance of the Tree Farm operations with the submitted Management Plan and relevant Codes of Practise.**
- 4. Prior to harvesting, a Harvesting Management Plan shall be submitted to the satisfaction of the Shire, where applicable.**

Advice Notes:

Note 1: Nothing in the approval or these conditions shall excuse compliance with all relevant written laws in the commencement and carrying out of the development.

Note 2: The following Codes of Practise shall apply to this Tree Farm, where applicable:

Code of Practice for Timber Plantations in Western Australia (Forest Industries Federation (WA) Inc., 2014)

Guidelines for Plantation Fire Protection (FESA, 2011) – now DFES Code of Practice for the use of Agricultural Chemicals in Western Australia (2005, Agriculture Western Australia).

Note 3: The applicant is advised that where applicable, a building permit is required prior to commencement of any building works.

Note 4: If an applicant is aggrieved by this decision there is a right of review by the State Administrative Tribunal in accordance with the *Planning and Development Act 2005* Part 14. An application must be made within 28 days of the determination.

2. Project and Objectives

Background

Landowner Garry Spouge purchased Lot 400 DP55711, “Ydontcha Too” on 1834 York-Williams Rd in April 2024. The property is less than 20 kms from Beverley and currently consists mostly of cleared unimproved pastures and remnant paddock trees. It is the owner’s understanding that the property has been cropped on the good soils and possibly grazed on the poorer sandy clays in recent years.

The landowner intends to continue mixed farming practices on the better agricultural land and would like to re-introduce a mixed species planting of native trees and shrubs on the areas of the property that have not recently been used for farming. The areas not used for farming are evident by the untilled areas of the satellite imagery in Figure 1. The proposed planting area is currently estimated at 33 hectares.

The 76 hectare property is Zoned ‘Rural’ within the Shire of Beverley Local Planning Scheme No. 3. According to the Scheme, permissibility of Tree Farms as a land use is discretionary (D), meaning that the use is not permitted unless the local government has exercised its discretion by granting development approval.

The scheme objectives for the Rural Zone are to preserve broad acre agricultural activities as primary land uses whilst allowing other land uses compatible with the primary use. Additionally, environmental qualities of the landscape, vegetation, soils and water bodies are to be maintained and enhanced.

The planting proposed for Ydontcha Too will be part of a carbon sequestration project, the YdontchaTwo Project, which will operate under the Australian Government’s Australian Carbon Credit Unit Scheme (ACCU Scheme). Under this Scheme, Garry Spouge who is the both the owner of the land and owner of the project will plant tree and shrub species native to the local area on the land that is not currently considered as viable agricultural land.

This management plan will describe the project in further detail in accordance with the Shire of Beverley Local Planning Policy: Tree Farms.

3. The YdontchaTwo Project

As part of the plan to increase local biodiversity and farm resilience in a drying climate, Garry Spouge would like to revegetate parts of Ydontcha Too on the less agriculturally viable parts of the property evident in Figure 1. On the property, the re-introduction of trees and shrubs will boost the forage and habitat diversity for existing local plant and animal species. The planting will increase the ecological buffer between existing remnant vegetation to the east of the property and cleared land, as well as connecting isolated paddock trees with larger areas of remnant vegetation. To help fund the costs of the planting, Garry has registered the planting with the Australian Carbon Credit Unit (ACCU) Scheme.

The block planting is currently estimated at 33 ha with the bulk of the planting proposed to occur in the eastern-most paddock adjacent to the York-Williams Rd, which consists of deep gravelly sands. The planting will extend west on the southern boundary, ensuring at least 100m of cleared land will be between the planting and the shed (Map 1 – Fire Management Map). The planting will follow the northern boundary from the east to the drainage lines bound by the properties to the north and west. Areas that have not been cropped in recent times will be prioritised for tree planting.

It is the intent that the planting will enhance the habitat and biological linkages between the existing fragments of vegetation whilst allowing traditional agricultural practices to continue.

The Ydontcha Too property sits within the Goonaping vegetation complex, dominated by open forests of *Eucalyptus marginata* (Jarrah) and *Eucalyptus wandoo* (Wandoo) on the sandy gravels, low woodland of *Banksia attenuata* on dry sandy sites and *Banksia-Melaleuca* on the moister sandy soils (Mattiske Vegetation Survey, 1998). The only native vegetation noted on the property are large and isolated Wandoo, Marri and Jarrah. Small fragments of remnant

bushland sit across the York-Williams Rd to the east of Ydontcha Too and become more distant surrounding the property to the north, south and west.

Re-introducing native trees and shrubs into the farming landscape will broaden existing connections between these remnant fragments of vegetation on and adjacent to the property. It is expected the planting will increase habitat and forage for the native flora and fauna. Very importantly, Banksia species will be planted in the gravelly sands adjacent to the York-Williams Rd in the hope that these trees will provide a preferred source of forage for the endangered black cockatoos. Water quality downslope of the planting is also expected to increase during recharge rain events by reduce sheet erosion and immobilising saline discharge from the soil profile.

In accordance with best practice and the ACCU Scheme Methodology, the Carbon Credits (Carbon Farming Initiative) (Reforestation by Environmental or Mallee Plantings—FullCAM) Methodology Determination 2014, the planting will aim to reflect the structure and composition of the surrounding intact the native woodlands. Species to be included in the planting are *Eucalyptus wandoo*, *E. loxophleba* subsp. *loxophleba*, *E. marginata*, *Corymbia calophylla*, *Banksia* and *Melaleuca* species. These species were identified as existing on the property or on nearby roadside reserves. A list of the species proposed to be planted is detailed in Appendix C.

The planting operations will be managed and implemented by Woodland Services, owned and operated by Dan and Jodi Wildy. Woodland Services have worked extensively throughout the central and northern wheatbelt providing tree planting services, plantation and project management for more than 17 years. Garry Spouge will be the manager of the project.

The required permanence period for the carbon project will be up to 30 years from the 1st September 2024, the date of project declaration by the Clean Energy Regulator.

The configuration of the planting will be in a block formation with small compartment sizes, firebreaks and internal tracks. Plantation management and firebreaks will be compliant with the Code of Practice for Plantations in Western Australia, the Guidelines for Plantation Fire Protection (FESA 2011) and Shire regulations. Although a revision of the FESA guidelines is in progress, it has not been finalised. The Guidelines suggest a 10 m bare earth perimeter firebreak. There will a 15m setback on external boundaries incorporated into the proposed planting area to allow for a 10m bare earth firebreak. Internal firebreaks will be 6 m with a 10 m setback (Map 1).

A screenshot from the Map of Bushfire Prone Areas (<https://maps.slip.wa.gov.au/landgate/bushfireprone/>) indicate that the eastern parts of Ydontcha Too have the potential to be impacted by bushfire from existing remnant and vegetation on the roadside of the York – Williams Rd and the vegetation on property immediately to the east of the road. Additional tree planting on the property will by default increase the potential area susceptible to bushfire attack on and adjacent to the property. However, the planting area will be developed with fire management and fire mitigation strategies in order to reduce the susceptibility to bushfire attack.

At this point in time there is no intent to harvest the trees at the end of the project, therefore this planting will not have any associated use of haul trucks on local roads for a tree harvest.

Current area prone to bushfire attack (<https://maps.slip.wa.gov.au/landgate/bushfireprone/>) Refer to the fire management plan (Section 11) for more info regarding fire protection.

4. Document scope

This document contains the details and maps of Ydontcha Too, with plans for establishment and longer term management as a result of the revegetation work, as well as a plan to manage the risk of fire.

5. Relevant codes of practice

In addition to the laws of Western Australia, the following are relevant:

- Code of Practice for Timber Plantations in Western Australia (Forest Industries Federation (WA) Inc., 2014)
- Guidelines for Plantation Fire Protection (FESA, 2011) – note that the agency FESA has now changed names to 'DFES'
- Code of Practice for the use of Agricultural Chemicals in Western Australia (2005, Agriculture Western Australia).

6. Site features

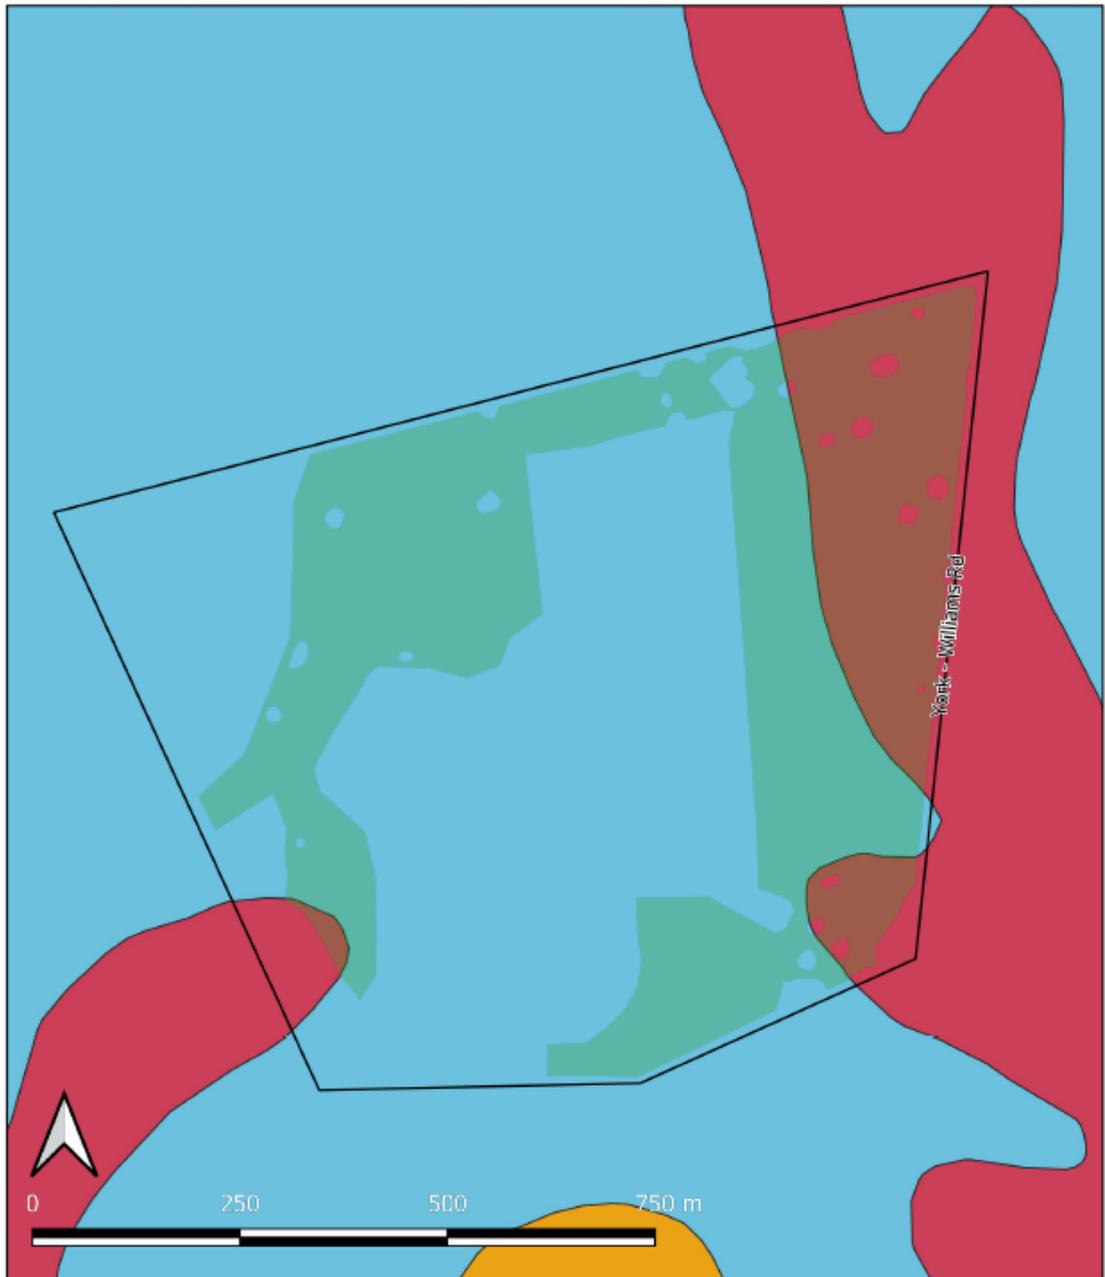

Topography: Gently sloping with a general north-east facing aspect

Soil description: Shallow sands to gravelly sands over clay

The Department of Primary Industries and Regional Development (DPIRD) has mapped land capability for 5 broad land uses for the south-western agricultural area of Western Australia. The land capability assessment method identifies possible physical, chemical and degradation constraints to land use on particular soils and landscapes.

DPIRD land capability – grazing: The majority of the farm is classified as B1 for grazing (DPRID land capability) indicating the land has a greater than 70 % chance of growing moderate to high quality pasture (Figure 2a).

DPIRD land capability – cropping: The majority of the farm is classified as C2 for cropping (DPRID land capability) indicating the land has more than 70 % low to very low capability for cropping (Figure 2b).

Vegetation remnants high in the landscape include Wandoo (*Eucalyptus wandoo*), Jarrah (*E. marginata*) and Marri (*Corymbia calophylla*).

7. Reforestation overview

Integration of trees into the landscape on Yondontcha Too

The small parcels of arable land on Ydontcha Too are not of sufficient scale to cover costs to implement traditional agricultural practices. Arable areas can be leased to neighbours, whilst the less viable areas can be planted to trees. Generation of carbon credits from the planting will recover the costs of the planting and property management.

The aims for the selection of land for revegetation are to:

- Target lower-productivity agricultural soils on the property (see photos 1,2), i.e. without recent cropping history
- Will connect and buffer plantings to existing isolated trees and remnant vegetation
- Screen the property from the York-Williams Rd
- Include sufficient revegetation land to make the project viable.

Photo 1 – Unimproved pasture on lower sloped adjacent to York – Williams Road.

Photo 2 – Adjacent to western boundary, unimproved pasture adjacent to parts of the property previously cropped

YdontchaTwo Project

Proposed planting area

Note: Firebreaks have been built into the planting areas as a 15 m setback from the property boundary.

8. Management of the reforestation

A reforestation plan for the site will continue to develop in terms of detail after further site assessment. This will include the refinement of the description of target site conditions, which will likely be based on natural occurrence of remnant vegetation on similar soils nearby. This will likely involve Wandoo and Jarrah-Bankisa dominated vegetation types.

There are short and long-term activities required to achieve the reforestation goals. This will preclude detrimental factors (grazing by hooved animals, water erosion, rabbit activity), and include activities such as ongoing management, fire risk suppression. The risk of the threats to the planting are assessed in Table 1.

Establishment

Forest establishment activities will be focussed on re-introducing trees, shrubs, and understorey species to the land, allowing time and natural vectors to add further herbaceous species to the mix.

Basic elements of establishment silviculture on reforestation sites are (i) species selection, (ii) ground cultivation techniques, (iii) water harvesting techniques i.e. V-or W- shaped planting lines are always used to accumulate rainfall, (iv) timing of operations, (iv) weed control, and (v) techniques to deal with site-specific issues, such as exclusion of kangaroos and rabbits.

For mixed species reforestation, direct seeding is often used for the establishment of species which have a life cycle which is geared towards regeneration by seed (seed usually abundant, and germinates reliably). Conversely, many long-lived species do not regenerate by seed easily, or would require larger amounts of seed than is readily available, and these are grown in nurseries and planted as seedlings. This usually includes larger overstorey eucalypt and melaleucas in southern Western Australia. For this reason, both direct seeding and seedling establishment may be used to re-establish a forest at Ydontcha Too.

Layout of revegetation areas

Planting compartments are less than 30 ha in size in line with the Guidelines for Plantation Fire Protection (DFES, 2011). Refer to Map 1 for further detail regarding the areas to be planted and compartment size.

Plantings will involve rows typically at a maximum of 6m spacing. These will be curved to follow the contour to allow rainfall to infiltrate and to minimise water and wind erosion.

Cultural heritage sites

There are no known heritage places on Ydontcha Too. The Avon River, a registered site is approximately 3.5 kms to the south-east at it's closest point. 'Bald Hill' and 'The Barracks' are currently lodged as places and sit more than 5 kms to the north-east (Aboriginal Heritage Places_DPLH_001, Appendix A).

Buffer zones and setbacks

The layout of the plantings aim to avoid having revegetation corridors near farm infrastructure (see Figure 2, Section 11). In any event minimum setbacks will be 50m from non-habitable sheds and 100m from habitable houses as per DFES/FESA guidelines. There are no other significant natural or built features on the property that require a formal buffer.

Access and firebreaks to within and surrounding the proposed planting will be in accordance with the Shire of Beverley Firebreak Notice, the Code of Practice for Timber Plantations in Western Australia (FIFWA, 2014) and the Guidelines

for Plantation Fire Protection (DFES, 2011). Location of tracks and firebreaks are in the Fire Management Map and Plan for Ydontcha Too (Section 11).

Ground preparation plan

Two systems are likely to be used across the site.

- Lines created with a scalper and ripper, which can contain direct seeded species with or without seedlings that have been raised in a nursery. Direct seeding lines are designed to create an even and controlled seed bed for accurate seed placement, with a water-harvesting 'V' profile.
- Seedling-only lines which are scalped, deep ripped and formed to create water-accumulating shapes ahead of the winter rains using Chatfield tree planter.

Erosion considerations

Site preparation takes into account the likelihood of erosion from wind or water. Contour site workings can be used to minimise water erosion, and the presence of continuously curving lines prevent very large areas being exposed in the event of a damaging wind. Presence of weed material on unplanted inter-rows is seen as beneficial in holding topsoils in the event of damaging winds.

Management of competitive plant species during establishment phase

Native perennial species, i.e. the plants being established as part of the establishment phase, are usually slower growing in the first year than winter-active annual pasture species, and can be choked out and killed in the first spring by moisture competition from more these aggressive annual species.

During establishment operations, light topsoil scalping will remove competitive annual species from near the establishing woodland species in the first year. Herbicide at label rates may be used prior to planting as a broadacre application to knock down competitive weed species in the inter-rows.

After establishment, a light ground cover of mixed pasture species ("weeds") between planting rows can be beneficial in providing a micro-climate for establishing trees over the summer months, including protection from wind events. The subsequent build up of dead weed material promotes soil biological processes and water infiltration following any rain.

Existing recent regrowth

The presence of existing native regrowth in some areas of the revegetation sites can be detrimental to establishing seedlings, since the perennial plants are very effective at depleting soil moisture levels in the soil which would otherwise be relied on by the newly established seedlings for survival during the first summer.

The intention is not to clear existing young regrowth vegetation but work around it. Areas with heavy regrowth may receive supplementary infilling with additional species.

Remnant vegetation

Remnant vegetation on the property consists of large isolated Wandoo and Jarrah trees that will not be disturbed or cleared. Planting rows do not generally go under the canopy of these trees in order to avoid root damage. New plantings of similar species will adjacent to the trees should enhance the longevity of the existing remnant vegetation. Larger stands of remnant vegetation will have the minimum 6m bare earth firebreak as specified in the DFES Guidelines for Plantation Fire Protection (DFES, 2011).

Planting of seedlings

Seedlings will be planted at a density of approximately 500-800 per hectare in winter 2025.

Seedling quality is one of the critical factors affecting the likelihood of success. Seedlings will be sourced from experienced nurseries with a proven track record operating in regional WA. The current species list for the planting can be viewed in Appendix C.

Nutrition

Soil testing may be used to gain knowledge on site mineral levels and salinity levels. Small amounts of conventional fertilizer, slow release fertilizer, or carbon-rich compost material may be added during the ground preparation phase as a result of this testing.

Insect management

Monitoring in the months following the establishment is critical to identify issues that can be altered by management practices.

In the unlikely event that monitoring and assessment indicates that foliar application of pesticides are required, these will be through ground based application by authorised providers at label rates.

Disease

Diseases in new plantings trees will be monitored at routine inspections, and if control measures are required they will be in line with industry practices.

Survival assessment and replanting

As well as ongoing monitoring, plantings will be surveyed for survival approximately 8 months following planting. This will identify any infill and replanting that will be required the following winter.

Monitoring and compliance of the planting is a requirement for the ACCU Scheme offset reports. Submission of offset reports are required at a maximum every five years to receive carbon credits.

Table 1. YdontchaTwo Project – Risk assessment, potential threats to plantation, community and surrounds

Assets	Distance	Bf hazard	Vulnerability	Level of Impact	Consequence	Likelihood	Risk based priority
Agricultural Crops	Adjacent	Medium	Moderate	Local	Major	Unlikely/ possible	Medium/high
Agricultural other	Adjacent	Medium	Low	Local	Moderate	Unlikely/ possible	Medium
Farm houses and buildings	100+m	Low	Moderate	Local	Major	Unlikely/ possible	Medium/high
Farm infrastructure (fences, gates, tanks)	Adjacent	Medium	Moderate	Local	Moderate	Unlikely/ possible	Low/medium
Powerlines	Not on property, present on neighbouring properties	Moderate	High	Local	Moderate	Unlikely/ possible	Low/medium
Environmental assets	Adjacent	Low	Low	Local	Minor	Unlikely/ possible	Low
Cultural assets	None within 500m	Low	High	Local			Low
Plantation years 0 -3		Low	High	Local	Moderate	Unlikely/ possible	Low/medium
Plantation years 4 - 6		Moderate	Moderate	Local	Moderate	Unlikely/ possible	Low/medium
Plantation years 6+		High – Very High	Low	Local	Moderate	Unlikely/ possible	Low/medium

9. Longevity of planted woodlands

The woodland and shrublands being re-created are intended to remain into the future without harvest.

Restoration inherently involves the use of natural processes over time to allow the planted woodlands to grow and develop and match the site.

Natural agents such as the incursion of seeds and spores in wind and through animal movement will slowly contribute to the biodiversity of the site. Animals and fungi will return naturally.

Natural thinning, where the most well-suited species eventually dominate in the variety of micro-sites within the restoration area, is an inevitable process. It is expected that some trees will die out over time, while others most suited to the particular planting site will survive and dominate.

There may be an ability to incorporate species that are useful for traditional indigenous harvest, such as fruits, nuts and wood products.

10. Ongoing management

A critical component of restoring natural woodlands is setting up systems to enable natural processes to continue through time, such as new seedling recruitment, and protection from damaging processes.

This involves aspects such as ongoing monitoring, ensuring that cloven-hooved animals (goats and sheep) are able to be effectively excluded, cool burning can be considered, rabbits, foxes and feral cats can be controlled, and fire risk management can be carried out as required.

Monitoring

Regular monitoring of the property and the plantings will be carried out, with emphasis on frequent checks through the early establishment phase, and in the lead up to and during the fire season. This includes general property inspections as well as forest health surveys.

Grazing

Grazing (agistment) has been used in the past for controlling fire risk in plantations, but long-term observations and experience in the rangelands of the Murchison, have increasingly shown the negative influence of grazing of sheep on long-term woodland health.

Excessive livestock grazing can cause episodic and severe wind erosion. On heavier soils, grazing can cause the soil to be packed by hard-hooved sheep, causing run off rather than infiltration after rain. New germinating native species are often eaten before they can establish. Changes occur gradually so can't be noticed, but long-term exclusion observations show dramatic differences in biodiversity values and restoration success between long-ungrazed and grazed woodlands.

To balance these issues with fire risk management, short intensity and highly controlled grazing may be used as a tool for reducing high fuel loads.

Fencing will be maintained at a level which is adequate for the management of stock and protection on the plantings on the property. Horses are currently and will continue to graze in the paddocks adjacent to the planted area to maintain grassy fuels loads.

Patchwork burning

While difficult to operationalise, the long-established practice of patch-work low-intensity burning can be beneficial to the goals of the woodland restoration once established seedlings have grown to a size to withstand the impact of low intensity fire. This practice reduces build-up of fuel loads to dangerous levels and stimulates germination of some species. Small patchwork burning giving a mosaic effect across the site enhances the diversity of habitats and ecosystems within the restoration area. Cool season burning will likely feature as an aspiration in the restoration plan.

Feral animal control

Feral animal control (foxes, rabbits) will be carried out as required by law.

Fire management

Fire management is addressed separately below.

11. Fire management plan

Aim

The aim of the fire management plan is to create a documented reference point for plantation fire management at Ydontacha Too. This plan refers to the tree plantation areas and associated firebreaks.

This section should be used primarily by the Landowner and project manager, Garry Spouge or the nominated personnel to manage fire risks on the properties.

The plan should be reviewed and updated periodically as contact details may change, and goals of land use and approaches to fire management may be updated from time to time.

Reference documents are the Shire of Beverley Firebreak Order 2024/25, Guidelines for Plantation Fire Protection (2011) and the Code of Practice for Timber Plantations in Western Australia (2014).

Contact details

Local Government Authority

Shire of Beverley

Fire Brigade contact details 2024

Brigade: Dale – Kokeby 5

Officer: Jack Barrett Lennard

Ph: 0412 310 340

Significant infrastructure

On the property

Shed – access from southern boundary, 20,000 L water tank, two dams. There are no powerlines on the property.

Shed will be 100 m or more from the plantation area.

Surrounding the property

Southern Boundary - house 300 m from the closest part of the planting.

Northern Boundary - house 500 m from the closest part of the planting.

Western Boundary – house 400 m from the closest part of the planting.

There are no known significant developments planned adjacent to Ydontcha Too.

Fire appliances and availability

800 L fire-fighting unit on trailer – on standby at shed

Water points

On site

-Two dams currently on site – available water most of the summer but may dry out

-One dam proposed to be built, location still to be finalised.

- Fire water will be maintained on site permanently. Available water tank includes 1 x 20,000 L -Adjacent to the shed.

Off site

-An overhead standpipe is situated in the town of Beverley on Brooking St, approximately 24 kms by road from Ydontcha Too. This will be ground-truthed (Watercorp spatial database; Water Standpipe_WCORP_071).

Fire maps

The fire map compliant with the FESA Guidelines for Plantation Fire Protection will be updated to reflect changes in the planted area once establishment is complete and prior to the first summer following establishment. Maps will be placed in a brightly painted cylinder ('map tube') at the main access into the plantation.

Vehicle access and firebreak construction

Plantation access design has been carried out with reference to the FESA Guidelines for Plantation Forest Protection.

The following approach is planned:

* Proposed tracks will make use of existing tracks where these are usefully positioned, or establish new tracks to minimise potential for long term erosion issues on the site where possible. Currently proposed internal tracks are shown on the map in Map 1.

* Additional access is in the form of boundary firebreaks and access around the perimeters of the planting areas.

* Setbacks from the property boundary will be 15m.

* Firebreaks on property external boundary of 10m width to be maintained as bare earth, as per FESA Guidelines for Plantation Fire Protection (2011).

* Some tracks will also serve as the network of internal firebreaks at 10 m width, 6 m bare earth.

Firebreak maintenance

Firebreak maintenance requirements will be periodically assessed through the fire season, with the aim of maintaining them to specifications of the relevant Fire Break Notice during the required fire season period (Appendix B).

Firebreaks will be maintained primarily through the use of herbicides at label rates, or via mechanical cultivation.

Power transmission lines

There are no power transmission lines on the property.

Potential ignition sources and measures to reduce hazards

Potential ignition sources are

- Lightning
- Vehicles/machinery on the properties
- Powerline faults on neighbouring properties
- Fires from activities on the properties such as welding/angle grinding
- Neighbouring fires such as hop-overs from stubble burns

Measures to reduce fire hazards include

- Restricting access to unwanted traffic
 - Implementing a policy of closing boundary gates to deter passers-by entering the property
- Possible use of periodic grazing so that livestock trample and eat grassy weeds
- Maintaining bare areas around the buildings through use of herbicide in winter
- Checklist for annual works program regarding the plantation and fire protection (Appendix B)

Fire detection, reporting and initial response

Fire detection traditionally relies on all people in the area being vigilant for smoke.

At the first sign of smoke, the local bush fire brigade should be immediately contacted. The number is available to be called (contact details above).

An alternative is to contact 000.

Initial response and attack of fires will be through the local bush fire brigade network due to the fact that speed of response is a significant factor in suppression of fires. The fire units on standby and the personal resources of Garry Spouge will be useful in the event of larger fire, or for mop up and fire ground monitoring. Signs indicating the location of water for fire-fighting will be located at relevant intersections of the property.

Garry Spouge recently made contact with the local brigade, will be part of the Brigade group chat and will do the Rural Fire Awareness course before becoming more active within the brigade. The local brigade officer is aware of the intent of the property during the coming years.

9.2 Proposed Ancillary Dwelling/Workforce Accommodation – 3158 (Lot 106) Westdale Road, Beverley

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	2 December 2024
Applicant:	JD Barrett-Lennard
File Reference:	WES 51828
Author and Position:	Stefan de Beer, Manager of Planning
Previously Before Council:	No
Disclosure(s) Of Interest:	None
Attachments:	Locality map, Site Plans, Application Letter, Floor Plan and Elevation Sketches

SUMMARY

An application has been received to construct an Ancillary Dwelling/Workforce Accommodation at 3158 (Lot 106) Westdale Road, Beverley. It will be recommended the application be approved.

BACKGROUND

The applicant is proposing to construct an Ancillary Dwelling/Workforce Accommodation at 3158 (Lot 106) Westdale Road, Beverley.

The subject property is zoned 'Rural' in terms of the *Shire of Beverley Local Planning Scheme No. 3* (LPS 3), is 73.24 ha in extent and contains two existing farm homesteads and associated Outbuildings.

The applicant submitted justification as per the letter attached.

COMMENT

The proposed Ancillary Dwelling/Workforce Accommodation are 'D' uses in the 'Rural' Zone pursuant to Zoning Table 3 in the *Shire of Beverley Local Planning Scheme No. 3* (LPS 3), which means that the use is not permitted unless the local Government has exercised its discretion by granting development approval.

From a land use planning perspective it is submitted that the proposal aligns with the aims and objectives of LPS3. It is not considered that the development would negatively impact future farming operations on the subject land.

The proposed siting of the development is not affected by Bushfire Prone Vegetation and therefore no BAL assessment was required to be submitted.

The two existing dwellings were approved prior to the LPS3 being Gazetted.

STATUTORY ENVIRONMENT

The application may be approved under the *Shire of Beverley's Local Planning Scheme No. 3*.

CONSULTATION

No consultation was deemed required.

FINANCIAL IMPLICATIONS

There are no financial implications relative to this application.

STRATEGIC IMPLICATIONS

Strategic Pillar: 4. Civic Leadership
Strategic Priorities: 4.3 Responsible planning

POLICY IMPLICATIONS

There are no policy implications relative to this application.

RISK IMPLICATIONS

It is considered that the proposal has insignificant risks.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium (5)	High (10)	High (15)	Severe (20)	Severe (25)
Likely	Low (4)	Medium (8)	High (12)	High (16)	Severe (20)
Possible	Low (3)	Medium (6)	Medium (9)	High (12)	High (15)
Unlikely	Low (2)	Low (4)	Medium (6)	Medium (8)	High (10)
Rare	Low (1)	Low (2)	Low (3)	Low (4)	Medium (5)

Risk Rating	Action
Low	Monitor for ongoing improvement.
Medium	Comply with risk reduction measures to keep risk as low as reasonably practical.
High	Review the risk and take additional measures to ensure risk is low as reasonably achievable.
Severe	Unacceptable risk level, reduction measures must be introduced before proceeding.

VOTING REQUIREMENTS

Simple Majority

OFFICER'S RECOMMENDATION & COUNCIL RESOLUTION

M4/1224

Moved Cr Lawlor

Seconded Cr Maxwell

That Council grant approval for an ancillary dwelling/workforce accommodation at 3158 (Lot 106) Westdale Road, Beverley, subject to the following conditions and advice notes:

Conditions:

- 1. Development shall be carried out only in accordance with the terms of the application as approved herein and any approved plan, prepared by the applicant and endorsed by Council's Shire Planner.**
- 2. As the Water Corporation reticulated sewer is not available the premises are to be connected to an approved wastewater treatment system, which complies with the requirements of the Treatment of Sewage and Disposal of Effluent and Liquid Waste Regulations. The approved system is not to be used for disposal of industrial liquid waste or other non-ablution wastes (refer to Advice Note 5).**
- 3. Suitable arrangements are to be made for provision of sufficient potable water for the dwelling.**

Advice Notes:

Note 1: If the development the subject of this approval is not substantially commenced within a period of 2 years, or another period specified in the approval after the date of determination, the approval will lapse and be of no further effect.

Note 2: Where an approval has so lapsed, no development shall be carried out without the further approval of the local government having first been sought and obtained.

Note 3: Nothing in the approval or these conditions shall excuse compliance with all relevant written laws in the commencement and carrying out of the development.

Note 4: The applicant is advised a building permit is required prior to commencement of any building works.

Note 5: With regard to Condition 2, an application is to be submitted to the Council's Environmental Health Section in conjunction with the Building Permit application.

Note 6: If an applicant is aggrieved by this decision there is a right of review by the State Administrative Tribunal in accordance with the *Planning and Development Act 2005* Part 14. An application must be made within 28 days of the determination.

22 November 2024

Stefan De Beer
Manager of Planning & Development Services
Shire of Beverley
136 Vincent St Beverley

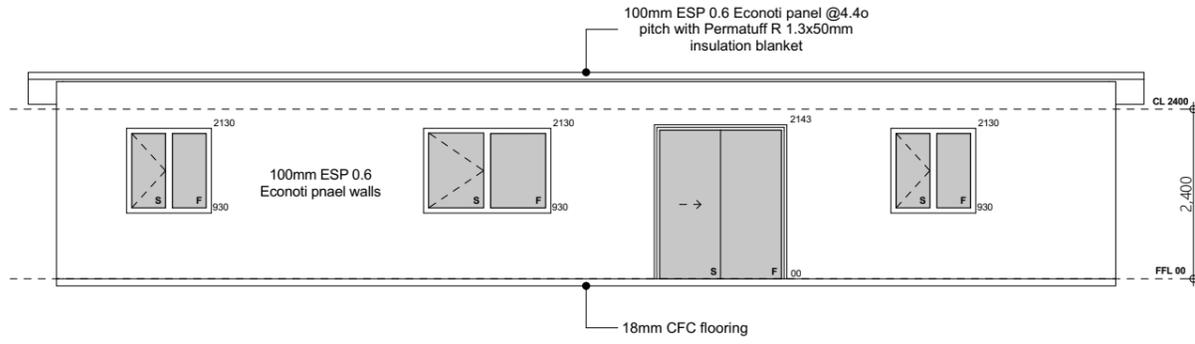

Dear Stefan

The attached proposal intends to allow for additional residential accommodation for both family members and staff at our farming property, Belhus, 3158 Westdale Road Beverley. The need to go down the transportable building path rather than an add-on to existing or permanent site build has been due to the lack of available building services in a realistic time frame. My understanding is that due to the transportable structure (brand new build) being under 70sqm it can be classed as an auxiliary dwelling. Thankyou for your consideration.

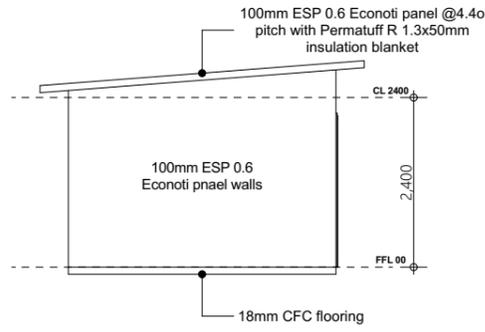

Sincerely,

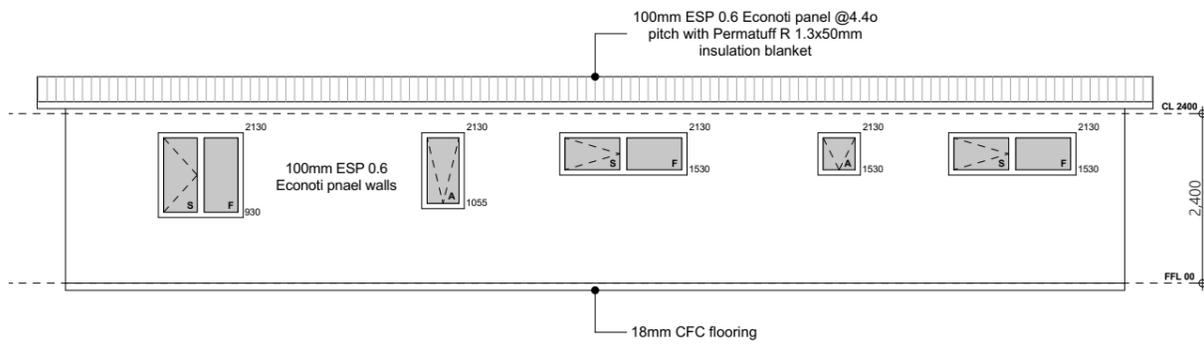

Jackson Barrett-Lennard

9.3 Proposed Ancillary Dwelling – 1375 (Lot 780) York-Williams Road

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	3 December 2024
Applicant:	Luke & Lisa Blanch
File Reference:	YOR 1540
Author and Position:	Stefan de Beer, Manager of Planning
Previously Before Council:	No
Disclosure(s) Of Interest:	None
Attachments:	Application Letter, Locality Map, Site Plan, Floor Plan and Elevation Sketches

SUMMARY

An application has been received to construct an Ancillary Dwelling at 1375 (Lot 780) York-Williams Road, Beverley. It will be recommended the application be approved.

BACKGROUND

The applicant is proposing to construct an Ancillary Dwelling at 1375 (Lot 780) York-Williams Road, Beverley.

The subject property is zoned '*Rural*' in terms of the *Shire of Beverley Local Planning Scheme No. 3* (LPS 3), is 40.4444 ha in extent and contains an existing farm homestead, associated Outbuildings and an approved Nursery.

The property is accessed from the York-Williams Road through registered access easements.

The applicant submitted justification as per the letter attached.

COMMENT

The proposed Ancillary Dwelling is a '*D*' use in the '*Rural*' Zone pursuant to Zoning Table 3 in the *Shire of Beverley Local Planning Scheme No. 3* (LPS 3), which means that the use is not permitted unless the local Government has exercised its discretion by granting development approval.

From a land use planning perspective it is submitted that the proposal aligns with the aims and objectives of LPS3. It is not considered that the development would negatively impact future farming operations on the subject land.

The proposed siting of the development is not affected by Bushfire Prone Vegetation and therefore no BAL assessment was required to be submitted.

STATUTORY ENVIRONMENT

The application may be approved under the *Shire of Beverley's Local Planning Scheme No. 3*.

CONSULTATION

No consultation was deemed required.

FINANCIAL IMPLICATIONS

There are no financial implications relative to this application.

STRATEGIC IMPLICATIONS

Strategic Pillar: 4. Civic Leadership
Strategic Priorities: 4.3 Responsible planning

POLICY IMPLICATIONS

There are no policy implications relative to this application.

RISK IMPLICATIONS

It is considered that the proposal has insignificant risks.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium (5)	High (10)	High (15)	Severe (20)	Severe (25)

OFFICER'S RECOMMENDATION & COUNCIL RESOLUTION

M5/1224

Moved Cr Davis

Seconded Cr Lawlor4

That Council grant approval for an ancillary dwelling at 1375 (Lot 780) York-Williams Road, Beverley, subject to the following conditions and advice notes:

Conditions:

- 1. Development shall be carried out only in accordance with the terms of the application as approved herein and any approved plan, prepared by the applicant and endorsed by Council's Shire Planner.**
- 2. As the Water Corporation reticulated sewer is not available the premises are to be connected to an approved wastewater treatment system, which complies with the requirements of the Treatment of Sewage and Disposal of Effluent and Liquid Waste Regulations. The approved system is not to be used for disposal of industrial liquid waste or other non-ablution wastes (refer to Advice Note 5).**
- 3. Suitable arrangements are to be made for provision of sufficient potable water for the dwelling.**

Advice Notes:

Note 1: If the development the subject of this approval is not substantially commenced within a period of 2 years, or another period specified in the approval after the date of determination, the approval will lapse and be of no further effect.

Note 2: Where an approval has so lapsed, no development shall be carried out without the further approval of the local government having first been sought and obtained.

Note 3: Nothing in the approval or these conditions shall excuse compliance with all relevant written laws in the commencement and carrying out of the development.

Note 4: The applicant is advised a building permit is required prior to commencement of any building works.

Note 5: With regard to Condition 2, an application is to be submitted to the Council's Environmental Health Section in conjunction with the Building Permit application.

Note 6: If an applicant is aggrieved by this decision there is a right of review by the State Administrative Tribunal in accordance with the *Planning and Development Act 2005* Part 14. An application must be made within 28 days of the determination.

Planning Application for a Granny flat at 1375 York Williams Rd Beverley

To: Shire of Beverley Councillors,

Please accept this planning proposal to build an Ancillary Dwelling at 1375 York Williams Rd Beverley as we, the owners, urgently require additional accommodation on the property. I am sure the Council is aware of the present shortage of housing in the Shire.

The kit type granny flat complies with the National Construction Code and is a Class 1A dwelling. It will be assembled on site by the Perth based company that builds and transports them.

It is under the 70 sqm limit for Granny Flats in the rural zone and has more than 10m setback from the boundary fence.

This Granny flat will be located outside of the fire zone, as shown on the site map. A Bushfire Attack Level Assessment will, therefore, not be submitted with this application.

There is a good water supply to meet extra needs and the dwelling will be powered by an off-grid system. It is constructed primarily of steel and proposed on high ground, well away from the Dale River, having a minimal environmental impact. Access will be along the western fence line, joining onto the registered access way to the road for the property near its north western corner.

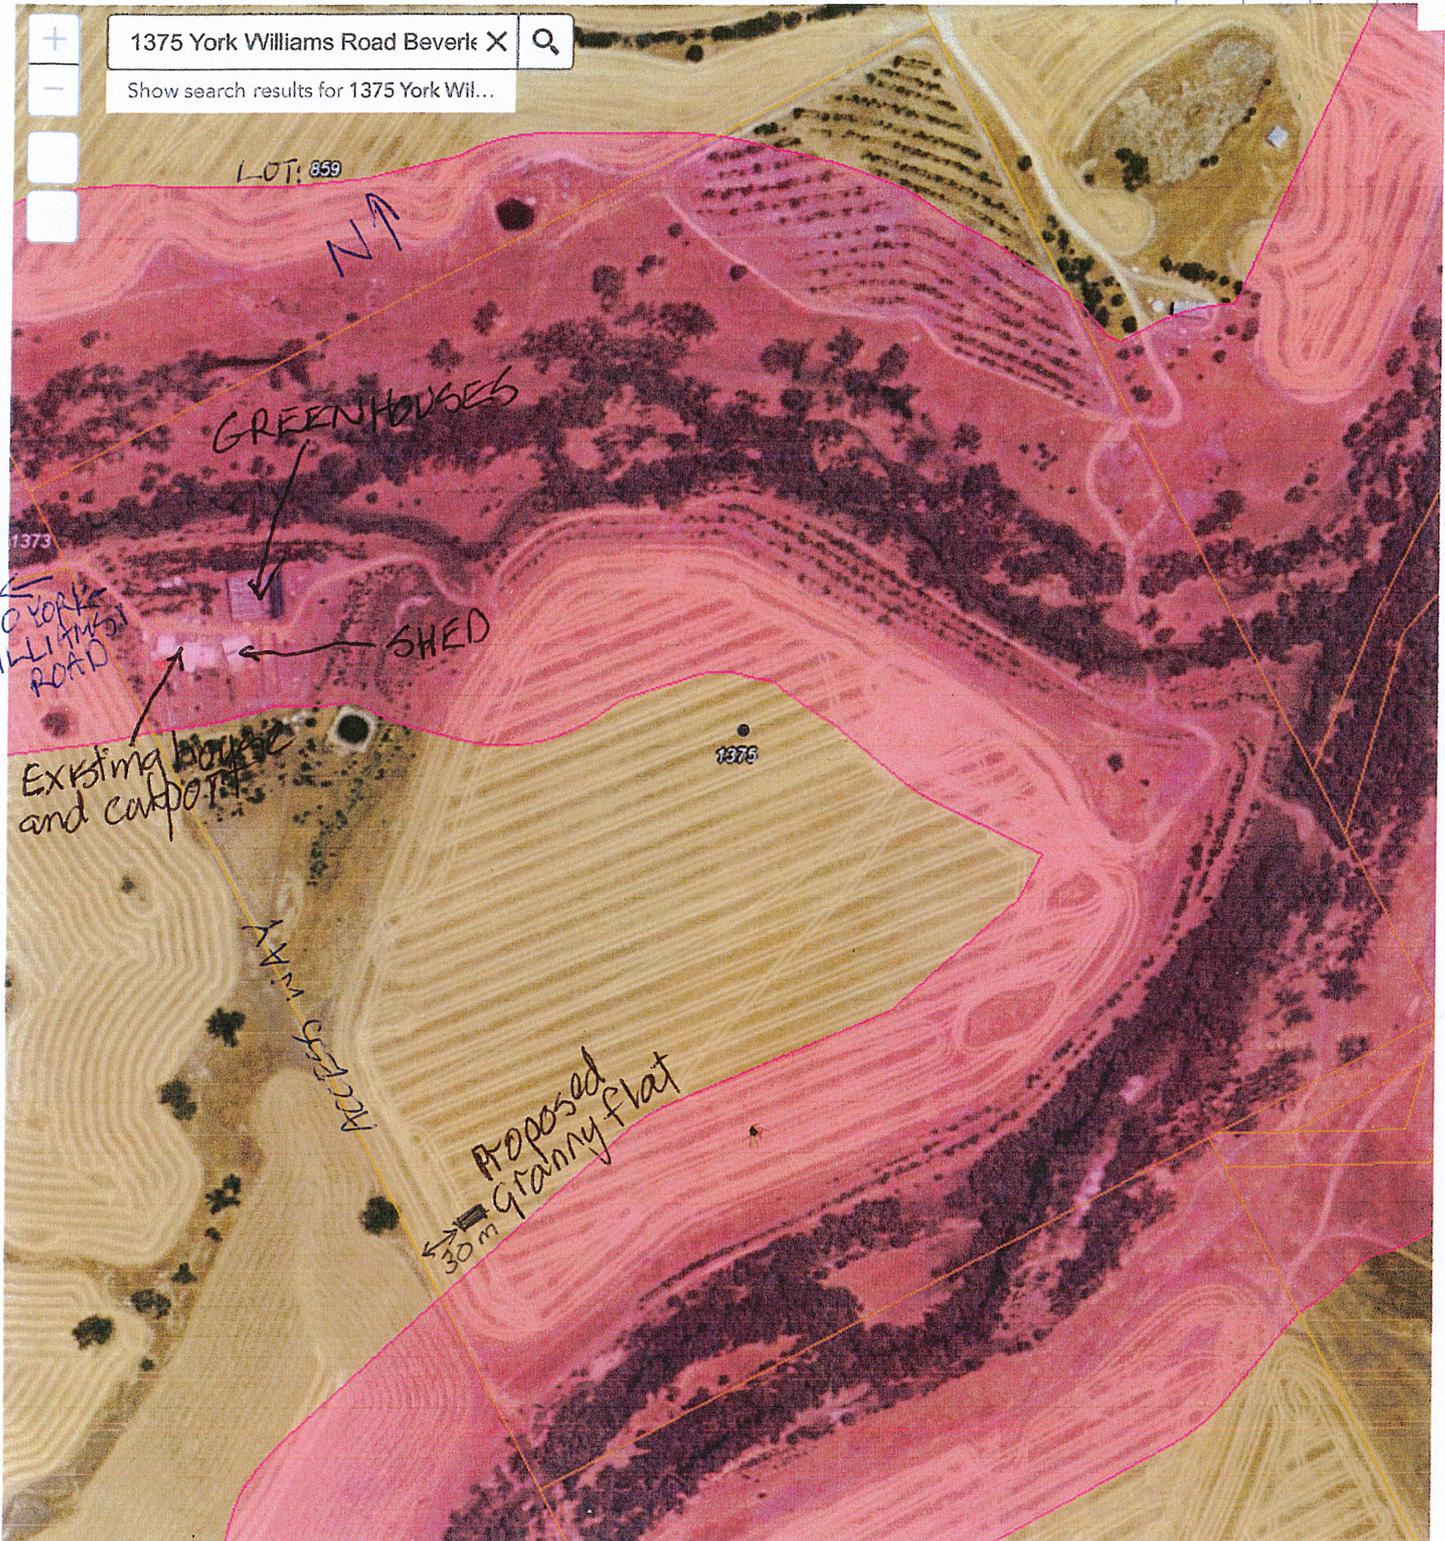

The Site Plan, Floor Plan and Elevations are submitted, along with the application form for your consideration.

Thanking you in advance,

Lisa Blanch and Luke Blanch.

9.4 Development Application – Outbuilding (Storage Shed), Water Tanks & Fencing – 23 (Lot 32) Brockman Street, Beverley

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	5 December 2024
Applicant:	MJ Butcher
File Reference:	BRO 97
Author and Position:	Stefan de Beer, Manager of Planning
Previously Before Council:	No
Disclosure(s) Of Interest:	None
Attachments:	Application Letter, Locality Map, Site Plan and Shed Drawings

SUMMARY

An application has been received to construct a Colorbond Outbuilding (Storage Shed) Water Tanks and Fencing at 23 (Lot 32) Brockman Street. The application will be recommended for approval.

BACKGROUND

The subject site is located at 23 (Lot 32) Brockman Street, is 2,179 m² in extent and zoned Residential R10/25 in terms of the *Shire of Beverley Local Planning Scheme No. 3* (LPS 3). It contains a single house and a storage shed (shed to be removed).

The proposal is to construct a Colorbond Outbuilding (Storage Shed) in extent 12m x 8m = 96 m².

The proposal for the storage shed requires departure from the Shire's Outbuilding Policy on the following matters:

- In terms of the Shire's Outbuilding Policy (Policy), the maximum wall height of any outbuilding on a property in this zone is to be 3.0 m, whereas the wall height of the new shed is proposed to be 3.6 m;
- The maximum roof height required by the Policy is 4 m. As a result of the proposed increased wall height the proposed roof height will be 4.658 m;
- The maximum area of an outbuilding in this zone is 75 m² as per the Policy. The area of the proposed new Outbuilding will be 96 m².

The applicant's letter of justification for the increased shed size is attached to this report.

It is also proposed to construct 2 x rainwater tanks of 5,300L each, and 2 x 27,500L rainwater tanks as shown on the attached site plan. Water Tanks to be made of plastic and cream in colour.

COMMENT

When considering the proposed departure beyond the parameters as set by the Outbuilding Policy, Shire planner is of the opinion that the following aspects of the development should be taken into consideration:

The specific siting of the Outbuilding on the property;
The general character of the immediate area;
The proposed use of the Outbuilding;
The size of the subject property.

It is the opinion that the proposed siting of the Outbuilding at the subject property is such that it will not have any negative visual impact on the surrounding area.

The Outbuilding will be used for amongst others the storage of trade tools and equipment, hence the shed dimensions required.

No adverse overshadowing from the Shed Building Bulk is anticipated onto neighbouring Residential Zoned properties.

It is also considered a better planning outcome to have sufficient under-roof storage available on a property as opposed to storage of items outside which could potentially negatively affect the visual amenity of an area.

Given the above site specific considerations and the size of the property it is not anticipated that the granting of Planning Approval for this application will create an undesirable precedent.

The proposal (including the proposed fencing) complies with other aspects of the Outbuilding Policy and the Residential Design Codes.

The proposed water tanks are all located behind the Primary and Secondary Street Setback Lines, well shielded by the proposed fencing and are recommended for approval.

STATUTORY ENVIRONMENT

Shire of Beverley Local Planning Scheme No. 3.

JUSTIFICATION: PROPOSED DEVELOPMENT AT 23 (LOT 32) BROCKMAN STREET

USE

Being a retired tradie I have shifted from a 6 bay shed and the current 2 bay shed which is not tall enough and not big enough to store 4 vehicles and trade tools and equipment that i have, like to keep them out of sight, safe and dry.

SHED

12m x8m being for personal use. 1.8 from the side fence and located where the old shed is which will be removed.

Shed by Stratco and drawings supplied.

Colorbond Merino

FENCE ON BROCKMAN STREET

(SECONDARY SIDE)

Fence set back no less than 3m from boundary line at 1.8m high, with an electric gate at 1.8m. Fence at 1.8m back to the house from the front fence.

WATER TANKS

2/ 5,300L water tanks located by house & behind house side fence, 1.930m Diameter by 2.070m high.

2/ 27.500L water tanks located behind the shed & 1.8m from the side fence, 3.780m diameter by 2.820m high.

SMITH STREET

(PRIMARY ACCESS)

1.8m fence from the house to the boundary fence.

1.2m fence with slats above to 1.8m along boundary to 53 smith street fence stepping back on a 45o angle to gate 1.5m set back from boundary line.

9.5 Development Application: Single House & Sea Container Outbuilding, 56 (Lot 123) Forrest Street

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	11 December 2024
Applicant:	Rudy and Marife Chilwan
File Reference:	FOR 51792
Author and Position:	Stefan de Beer, Manager of Planning
Previously Before Council:	N/A
Disclosure(s) Of Interest:	None
Attachments:	Application Letter, Locality Map, Site Plan, Dwelling Elevations & Layout, DWER Response

SUMMARY

An application has been received to construct a Single House and a Sea Container Outbuilding at 56 (Lot 123) Forrest Street. It will be recommended the application be approved.

BACKGROUND

The subject property is located at 56 (Lot 123) Forrest Street is zoned 'Rural Townsite' with a density coding of R40 in terms of the *Shire of Beverley Local Planning Scheme No. 3 (LPS 3)*. The lot is 809 m² in extent and vacant.

In terms of LPS 3 a 'single house' is a 'D' use (*discretionary*) in this Zone which means that *'the use is not permitted unless the local government has exercised its discretion by granting development approval'*.

It is also proposed to deposit a Sea Container towards the rear of the property to be used as an Outbuilding. It is proposed to render the Sea Container with horizontal Weatherboard to match the residence, including a low pitched roof with gutters.

COMMENT

The proposal is deemed to accord with the objectives of the *Rural Townsite Zone* pursuant to LPS3.

Applications for planning approval for Single Houses at 38 (Lot 1) and 40 (Lot 2) Queen Street, and 44 (Lot 12) Dawson Street (also within the 'Rural Townsite' zone), had previously been considered and approved by Council.

The proposed development is affected by Bushfire Prone Vegetation. A BAL assessment determined a BAL Rating of 12.5. Should Council resolve to approve the application it will be recommended that an appropriate condition of planning approval be imposed to address this matter.

As a section of the development proposed is located within the Avon River Flood Fringe, the proposal was referred to the *Department of Water and Environmental Regulation (DWER)* whose comments are attached to this report. Should Council resolve to approve the application, these will be recommended be made a condition of Planning Approval.

It is also proposed to impose a condition that will require stormwater to be retained on site where possible, through containment or infiltration as permitted by soil conditions, recovery or reuse, as per Clause 5.3.9 of the R-Codes.

It is also proposed to impose a condition that will require the rendering of the Sea Container as proposed in the application.

The proposal complies with the Residential Design Codes for the R40 density coding.

CONSULTATION

No consultation was deemed required.

STATUTORY ENVIRONMENT

The application may be approved under the Shire of Beverley's Local Planning Scheme No. 3.

FINANCIAL IMPLICATIONS

There are no financial implications relative to this application.

STRATEGIC IMPLICATIONS

Strategic Pillar: 4. Civic Leadership

Strategic Priorities: 4.3 Responsible planning

POLICY IMPLICATIONS

There are no policy implications relative to this application.

RISK IMPLICATIONS

It is considered that the proposal has insignificant risks.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood

VOTING REQUIREMENT

Simple Majority

OFFICER'S RECOMMENDATION & COUNCIL RESOLUTION

M7/1224

Moved Cr Lawlor

Seconded Cr Davis

That Council resolve to grant planning approval for a Single House and Sea Container Outbuilding at 56 (Lot 123) Forrest Street, Beverley, subject to the following conditions and advice notes:

Conditions:

- 1. Development shall be carried out only in accordance with the terms of the application as approved herein and any approved plan, prepared by the applicant and endorsed by Council's Shire Planner.**
- 2. Where practicable stormwater shall be retained on the subject property through containment or infiltration as permitted by soil conditions, recovery or reuse, as per Clause 5.3.9 of the R-Codes, to the satisfaction of the Shire.**
- 3. Prior to occupation, the development hereby permitted shall be connected to the reticulated Water Corporation deep sewer system to the satisfaction of the Shire.**
- 4. Prior to occupation, the development hereby permitted shall be connected to the reticulated Water Corporation potable water supply system to the satisfaction of the Shire.**
- 5. Prior to the occupation of the development, a vehicle crossover shall be constructed to the satisfaction of the Shire.**
- 6. The new single house construction standard shall adhere to Australian Standard AS3959 for a determined Bushfire Attack Level of 12.5 (refer to Advice Note 5).**
- 7. As the property is located within the Avon River Flood Fringe Area, the minimum habitable floor level of 194.67 m AHD is required, as advised by the Department of Water and Environmental Regulation (advice attached hereto).**
- 8. The Sea Container shall be rendered as proposed in the planning application to the satisfaction of the Shire.**

Advice Notes:

Note 1: If the development the subject of this approval is not substantially commenced within a period of 2 years, or another period specified in the approval after the date of determination, the approval will lapse and be of no further effect.

Note 2: Where an approval has so lapsed, no development shall be carried out without the further approval of the local government having first been sought and obtained.

Note 3: Nothing in the approval or these conditions shall excuse compliance with all relevant written laws in the commencement and carrying out of the development.

Note 4: The applicant is advised a building permit is required prior to commencement of any building works.

Note 5: With regard to Condition 6, Australian Standard AS3959 Sections 3 & 5 apply.

Note 6: If an applicant is aggrieved by this decision there is a right of review by the State Administrative Tribunal in accordance with the *Planning and Development Act 2005* Part 14. An application must be made within 28 days of the determination.

The Shire of Beverley
136 Vincent Street
Beverley WA 6304

Attn. Stefan De Beer

On behalf of my clients Rudy and Marife Chilwan, I wish to submit a development proposal for 56 Forrest Street, Beverley.
The land is currently zoned 'Rural Townsite' and we are wanting to re-zone for single residence land use which will require Beverley town council approval.
This will entail a single dwelling on the land together with a converted 20' sea-container for storage during the construction stage and a studio when the dwelling is complete.
The dwelling will be connected to all services provided by the Shire which includes; water, power and sewage disposal to the town sewage system.
The proposed development will be fenced with access gates, a concrete driveway and a crossover conforming to Council regulations.
I have attached a set of drawings which include a site plan, elevations and details.
Please let me know if you need additional information.

Regards
Gary Byfield
0414 885 338
gwb151@gmail.com

ps I will get Rudy to fill out the forms for submission as well.

OFFICIAL

OFFICIAL

Your ref: 2024/034

Our ref: RF10107, PA 068715

Good morning,

RE: DEVELOPMENT APPLICATION – SINGLE HOUSE & SEA CONTAINER OUTBUILDING – 56 (LOT 123) FORREST STREET, BEVERLEY

Thank you for providing the above referral for the Department of Water and Environmental Regulation (Department) to consider.

The Department, in carrying out its role in floodplain management, provides advice and recommends guidelines for development on floodplains with the object of minimising flood risk and damage.

The Avon Flood Study shows that the lot is affected by flooding during major events with the following flood levels:

Event	Flood level
1 in 10 (10%) AEP	192.75 m AHD
1 in 25 (4%) AEP	193.35 m AHD
1 in 100 (1%) AEP	194.17 m AHD (see attached map)

Based on our floodplain management strategy for the area, proposed development (i.e., filling, building, etc) on the Lot that is located outside of the floodway is considered acceptable with respect to major flooding. However, a minimum habitable floor level of 0.5 metre above the appropriate 1 in 100 (1%) AEP flood level (i.e., 194.67 m AHD) is recommended to ensure adequate flood protection.

A failure to properly adhere to these recommendations will result in a greater exposure to risks of flood damage. Please note that this advice is related to major flooding only and other planning issues, such as stormwater drainage, may also need to be addressed.

If you have any queries, please contact me.

Kind regards,

Diana Nussey

11. FINANCE

11.1 Monthly Financial Report

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	11 December 2024
Applicant:	N/A
File Reference:	N/A
Author and Position:	Simon Marshall, Deputy Chief Executive Officer
Previously Before Council:	N/A
Disclosure(s) Of Interest:	Nil
Attachments:	November 2024 Financial Reports

SUMMARY

Council to consider accepting the financial report for the period ending 30 November 2024.

BACKGROUND

There is a statutory requirement that the Local Government is to prepare, each month, a statement of financial activity reporting on sources and applications of its funds and to present the statement to Council.

Council adopted a budget variance reporting parameter of 10% on budgeted items of \$10,000 or greater at the July 2024 Ordinary Meeting, item 11.4.

COMMENT

The monthly financial reports for the period ending 30 November 2024 have been provided and include:

- Financial Activity Statement by Nature;
- Statement of Net Current Assets;
- Statement of Financial Position; and
- Investment of Surplus Funds Report.

STATUTORY ENVIRONMENT

Section 6.4(1) of the *Local Government Act* provides that a local government is to prepare an annual financial report for the preceding financial year and such other financial reports as are prescribed.

Regulation 34 of the *Local Government (Financial Management) Regulations* requires a Statement of Financial Activity to be prepared each month which is to contain the following details:

- (a) annual budget estimates;
- (b) budget estimates to the end of the month;
- (c) actual amount of expenditure and revenue;
- (d) material variances between comparable amounts in (b) and (c) above; and
- (e) the net current assets at the end of the month to which the statement relates (i.e. surplus / (deficit) position).

The Statement is to be accompanied by:

- (a) explanation of the composition of net current assets, less committed assets and restricted assets;

- (b) explanation of the material variances; and
- (c) such other information considered relevant by the local government.

FINANCIAL IMPLICATIONS

All revenue and expenditure, unless disclosed in the notes to material variances, are as per the 2024/25 Budget.

STRATEGIC IMPLICATIONS

- Strategic Pillar: 4. Civic Leadership
- Strategic Priorities: 4.1 Community and customer focus
4.2 Continuous organisational improvement
4.3 Responsible planning

POLICY IMPLICATIONS

AF004 – Investing Surplus Funds

RISK IMPLICATIONS

It is a requirement of the *Local Government (Financial Management) Regulations 1996* that a Statement of Financial Activity is prepared within two months of the end of the reporting period. This report mitigates the risk of non-compliance.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium	High	High	Severe	Severe
Likely	Low	Medium	High	High	Severe
Possible	Low	Medium	Medium	High	High
Unlikely	Low	Low	Medium	Medium	High
Rare	Low	Low	Low	Low	Medium

Risk Rating	Action
Low	Monitor for ongoing improvement.
Medium	Comply with risk reduction measures to keep risk as low as reasonably practical.
High	Review the risk and take additional measures to ensure risk is low as reasonably achievable.
Severe	Unacceptable risk level, reduction measures must be introduced before proceeding.

VOTING REQUIREMENTS

Simple Majority

<p>OFFICER’S RECOMMENDATION & COUNCIL RESOLUTION M8/1224 Moved Cr Lawlor Seconded Cr Davis That the monthly financial report for the month of November 2024 be accepted and material variances be noted.</p> <p style="text-align: right;">CARRIED 4/0</p> <p style="text-align: right;"><i>For: Cr White, Cr Davis, Cr Lawlor & Cr Maxwell</i> <i>Against: Nil</i></p>

11.2 Accounts Paid by Authority

Submission To:	Ordinary Council Meeting 14 December 2024
Report Date:	11 December 2024
Applicant:	N/A
File Reference:	N/A
Author and Position:	Simon Marshall, Deputy Chief Executive Officer
Previously Before Council:	N/A
Disclosure(s) Of Interest:	Nil
Attachments:	November 2024 List of Reports

SUMMARY

Council to consider authorising the payment of accounts.

BACKGROUND

The following list represents accounts paid by authority for the month of November 2024.

COMMENT

Unless otherwise identified, all payments have been made in accordance with Council's 2024/25 Budget.

STATUTORY ENVIRONMENT

Regulation 12 of the *Local Government (Financial Management) Regulations* provides that:

- (1) A payment may only be made from the municipal fund or the trust fund —
 - (a) if the local government has delegated to the CEO the exercise of its power to make payments from those funds — by the CEO; or
 - (b) otherwise, if the payment is authorised in advance by a resolution of the council.
- (2) The council must not authorise a payment from those funds until a list prepared under regulation 13(2) containing details of the accounts to be paid has been presented to the council.

Regulation 13 of the *Local Government (Financial Management) Regulations* provides that:

- (1) If the local government has delegated to the CEO the exercise of its power to make payments from the municipal fund or the trust fund, a list of accounts paid by the CEO is to be prepared each month showing for each account paid since the last such list was prepared —
 - (a) the payee's name;
 - (b) the amount of the payment;
 - (c) the date of the payment; and
 - (d) sufficient information to identify the transaction.
- (2) A list of accounts for approval to be paid is to be prepared each month showing —
 - (a) for each account which requires council authorisation in that month —
 - (i) the payee's name;
 - (ii) the amount of the payment; and
 - (iii) sufficient information to identify the transaction;

and

- (b) the date of the meeting of the Council to which the list is to be presented.
- (3) A list prepared under sub regulation (1) or (2) is to be —
 - (a) presented to the Council at the next ordinary meeting of the council after the list is prepared; and
 - (b) recorded in the minutes of that meeting.

FINANCIAL IMPLICATIONS

Unless otherwise identified, all payments have been made in accordance with Council’s 2024/25 Budget.

STRATEGIC IMPLICATIONS

Nil

POLICY IMPLICATIONS

Authority to Purchase – All acquisitions should be in accordance with budget provisions or to a maximum specified cost.

RISK IMPLICATIONS

Failure to present a detailed listing in the prescribed form would result in non-compliance *Local Government (Financial Management) Regulations 1996*, this report mitigates the risk of non-compliance.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium	High	High	Severe	Severe
Likely	Low	Medium	High	High	Severe
Possible	Low	Medium	Medium	High	High
Unlikely	Low	Low	Medium	Medium	High
Rare	Low	Low	Low	Low	Medium

Risk Rating	Action
Low	Monitor for ongoing improvement.
Medium	Comply with risk reduction measures to keep risk as low as reasonably practical.
High	Review the risk and take additional measures to ensure risk is low as reasonably achievable.
Severe	Unacceptable risk level, reduction measures must be introduced before proceeding.

12. ADMINISTRATION

12.1 Regulation 17 Review

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	29 November 2024
Applicant:	N/A
File Reference:	ADM 0163
Author and Position:	Stephen Gollan, Chief Executive Officer
Previously Before Council:	Annually
Disclosure(s) Of Interest:	Nil
Attachments:	2024 Risk Profile Summary (pgs 114-119 removed)

SUMMARY

Council to consider receiving the Risk Management Regulation 17 Review.

BACKGROUND

Under regulation 17 of the *Local Government (Audit) Amendment Regulations 2013*, the Chief Executive Officer is to review the appropriateness and effectiveness of the Shire of Beverley's systems and procedures in relation to risk management, internal control and legislative compliance.

COMMENT

The Chief Executive Officer and Deputy Chief Executive Officer have conducted a review using the Risk Management template provided by Council's Insurers, LGIS.

Attached is the summary of control results covering identified risk areas including:

- Misconduct;
- Business and Community disruption;
- Environmental management;
- Errors, omissions and delays;
- External theft and fraud;
- IT and Communication systems;
- Statutory compliance;
- Safety and security;
- Providing advice and information;
- Employment practices;
- Records management;
- Project/Change management;
- Engagement practices;
- Supplier management;
- Asset sustainability practices; and
- Facility management.

Each identified risk was considered individually with risk ratings being applied based on the following risk matrix:

Risk Matrix						
Consequence		Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood		1	2	3	4	5
Almost Certain	5	Moderate (5)	High (10)	High (15)	Extreme (20)	Extreme (25)
Likely	4	Low (4)	Moderate (8)	High (12)	High (16)	Extreme (20)
Possible	3	Low (3)	Moderate (6)	Moderate (9)	High (12)	High (15)
Unlikely	2	Low (2)	Low (4)	Moderate (6)	Moderate (8)	High (10)
Rare	1	Low (1)	Low (2)	Low (3)	Low (4)	Moderate (5)

Following the risk determination, improvement initiatives were formulated and enacting timeframes set with the aim of improving overall future risk ratings.

STATUTORY ENVIRONMENT

Regulation 17 of the *Local Government (Audit) Amendment Regulations 2013* requires that:

- (1) The CEO is to review the appropriateness and effectiveness of a local government's systems and procedures in relation to —
 - (a) risk management; and
 - (b) internal control; and
 - (c) legislative compliance.
- (2) The review may relate to any or all of the matters referred to in subregulation (1)(a), (b) and (c), but each of those matters is to be the subject of a review at least once every 2 calendar years.
- (3) The CEO is to report to the audit committee the results of that review.

FINANCIAL IMPLICATIONS

Nil

STRATEGIC IMPLICATIONS

Strategic Pillar: 4. Civic Leadership

Strategic Priorities: 4.2 Continuous organisational improvement
4.3 Responsible planning

RISK IMPLICATIONS

Failure to review the appropriateness and effectiveness of a local government's systems and procedures would result in non-compliance *Local Government (Audit) Amendment Regulations 2013*. Approval of this item will mitigate the consequence.

Consequence	Insignificant	Minor	Moderate	Major	Catastrophic
Likelihood					
Almost Certain	Medium	High	High	Severe	Severe
Likely	Low	Medium	High	High	Severe
Possible	Low	Medium	Medium	High	High
Unlikely	Low	Low	Medium	Medium	High
Rare	Low	Low	Low	Low	Medium

Risk Rating	Action
Low	Monitor for ongoing improvement.
Medium	Comply with risk reduction measures to keep risk as low as reasonably practical.
High	Review the risk and take additional measures to ensure risk is low as reasonably achievable.
Severe	Unacceptable risk level, reduction measures must be introduced before proceeding.

Shire of Beverley Risk Dashboard Report December 2024

Executive Summary

Being the Shire's third report under the introduced risk management framework, focus is on embedding and driving continual improvement. Future reports will continue to provide relevant insight and recommendations to assist governance activities for the Senior Management Team. It is supported by the attached documents that were produced through a workshop on the 25th November 2024.

1. Risk Profiles for the 16 themes discussed.
2. Risk Management Policy amendments and Procedures.

Recommendations

Embedding

1. Arrange for the attached Policy amendments and Procedures to be endorsed and adopted.

Risk Profiles

1. Discuss and review the attached Risk Profiles Review and approve all Risk Profiles (from a Risk & Control perspective).
2. Confirm Current Issues / Actions / Treatments (Responsibility & Due Date)

Misconduct		Risk Moderate	Control Adequate
Current Issues / Actions / Treatments	Due Date	Responsibility	
Carry out new employee Induction process	On Going	HR	
Follow up Performance Review process	On Going	CEO/MOW/DCEO	
Councillor training	On Going	CEO/Council	

Business & community disruption		Risk High	Control Adequate
Current Issues / Actions / Treatments	Due Date	Responsibility	
Review Recovery Plans	Jun-25	CESM	
Seek Mitigation Works Funding and coordinate works	Jun-25	CESM	
Ensure volunteers and staff are trained in line with WHS legislation requirements	On Going	CESM	

Inadequate environmental management		Risk Moderate	Control Adequate

Develop Bridge Maintenance Program	Jun-25	MOW	
Deliver Footpath Replacement Program	On Going	MOW	

Ineffective management of facilities / venues / events		Risk Moderate	Control Adequate
Current Issues / Actions / Treatments	Due Date	Responsibility	
Beverley Air Show Feasibility and Risk management plans.	Jun-25	MPDS	

12.2 Use of the Common Seal

Submission To:	Ordinary Council Meeting 18 December 2024
Report Date:	6 December 2024
Applicant:	Administration
File Reference:	ADM 0265
Author and Position:	Stephen Gollan, Chief Executive Officer
Previously Before Council:	Reported as occurs
Disclosure(s) Of Interest:	Nil
Attachments:	Nil

SUMMARY

Council to endorse the use of the Common Seal.

BACKGROUND

Allocation of the Common Seal requires accompanying signatures of both the Shire President (or Deputy) and Chief Executive Officer (or person acting in that position).

COMMENT

The Common Seal has recently been attached to the following documents:

1. Licence Agreement, Office 1, Cornerstone Community Centre between Shire of Beverley and Kelly Mann.

STATUTORY ENVIRONMENT

Local Government Act 1995, Part 9, Division 3, Execution of documents states:

- (1) A document is duly executed by a local government if -
 - (a) the common seal of the local government is affixed to it in accordance with subsections (2) and (3); or
 - (b) it is signed on behalf of the local government by a person or persons authorised under subsection (4) to do so.
- (2) The common seal of a local government is not to be affixed to any document except as authorised by the local government.
- (3) The common seal of the local government is to be affixed to a document in the presence of –
 - (a) the mayor or president; and
 - (b) the chief executive officer or a senior employee authorised by the chief executive officer,
each of whom is to sign the document to attest that the common seal was so affixed.
- (4) A local government may, by resolution, authorise the chief executive officer, another employee or an agent of the local government to sign documents on behalf of the local government, either generally or subject to conditions or restrictions specified in the authorisation.

- (5) A document executed by a person under an authority under subsection (4) is not to be regarded as a deed unless the person executes it as a deed and is permitted to do so by the authorisation.
- (6) A document purporting to be executed in accordance with this section is to be presumed to be duly executed unless the contrary is shown.
- (7) When a document is produced bearing a seal purporting to be the common seal of the local government, it is to be presumed that the seal is the common seal of the local government unless the contrary is shown.

CONSULTATION
